

Name	Site testing using various test design techniques.				
Description	Tests are created using test design techniques: Equivalence partitioning, Boundary values, Pairwise testing, and Error Guessing. Using valid and invalid data.				
Status	In progress.				
Preconditions	Go to https://modivo.ua/				
№	Priority	Test	Test data	Valid data?	Comments
		Equivalence partitioning			
1	Low	Enter "Men's cardigan" in the product search field	"Men's Cardigan"		
2	Low	Enter "Spinning" in the product search field	"Spinning"		The data is not valid because the site sells only clothes and accessories
3	Medium	Register by entering a valid email	Name: Daniil, Password: Password123, Email: dpinchuk@gmail.com		
4	Medium	Register by entering an invalid email	Name: Daniil, Password: Password123, Email: dpinchukmail.com		The email is not valid because the "@" is missing
		Boundary Values (Password must include 8 characters minimum)			
5	Medium	Register by entering a 7-character password	Name: Daniil, Password: Passwor, Email: dpinchuk@gmail.com		The password is not valid because it is less than 8 characters
6	Medium	Register by entering a 8-character password	Name: Daniil, Password: Password, Email: dpinchuk@gmail.com		
		Pairwise testing			
7	Low	Check product filtering by Gender, Type of Clothing, Brand	Gender: Man, Type of Clothing: Sweatshirt, Brand: United Colors Of Benetton.		
8	Low	Check product filtering by Gender, Type of Clothing, Brand	Gender: Woman, Type of Clothing: Pant, Brand: Tommy Hilfiger.		
9	Low	Check product filtering by Gender, Type of Clothing, Brand	Gender: Child, Type of Clothing: Coat, Brand: C.P. Company.		This filter combination is not valid because C. P. Company does not make coats for children
10	Low	Check product filtering by Gender, Type of Clothing, Brand	Gender: Man, Type of Clothing: Sneakers, Brand: Dudino.		This filter combination is not valid because the Dudino company produces only children's shoes
		Error guessing			
11	Medium	Try to log in to the account by leaving the login and password fields empty			The data is not valid because the fields are empty
12	Low	Enter 10,000 in the "From" price filter field, and 9,999 in the "To" field	From: 10,000 UAH To: 9,999 UAH		The data is not valid because the filtering must be from least to greatest
13	Medium	Enter a non-existing brand in the product search field	Brand: Entriqe		The data is not valid because such a brand does not exist
14	High	Enter a non-existing code in the Promo code field when placing an order.	101010101010101		The data is not valid because such a promo code does not exist
